

# Alamin mo, BRO! POWER CYCLE

1

Let's talk about POWER CYCLE.

Power cycle is done to refresh your connection to the Smart network.

How is it done? Madali lang!

2 Can you see the computer icons at the lower right corner of your monitor?

3 I right click mo lang yun and then choose DISABLE.

4

Tanggalin ang Smart Bro cable from your computer

5

Tanggalin mo rin sa pagkakasak-sak ang iyong POWER Supply.

6

Wait for 15 seconds at pwede mo na ulit ibalik ang connection ng iyong power adaptor sa electric outlet at cable ng iyong Smart Bro sa iyong computer.

7 To enable your LAN connection, click on START

8

Go to Control Panel

9

Choose Network Connections

10

Right Click the computer icons and then choose enable

11

Pag na complete mo na ito, pwede mo na ulet I try na mag connect sa internet.

Tandaan, madaling gawin kapag ating alam kaya
